

## Identify Bankruptcies with Confidence

According to the American Bankruptcy Institute, there were 789,222 non-commercial bankruptcy filings in the United States in 2015, an average nationwide per capita of 2.3 bankruptcies for every 1,000 people. With such high numbers – especially in the collections industry – it is important to have a bankruptcy product that can quickly and accurately identify bankruptcy statuses.

LocateSmarter offers three variations of bankruptcy products to suit your business needs: scrubs, standard monitoring and custom monitoring.

### Comprehensive Databases

Our bankruptcy products return less false positives and false negatives, reducing regulatory risk and preventing lost revenue opportunities. We accomplish this by obtaining data from 93 court sites, 281 court divisions/offices and internally appending social security numbers from six databases to ensure data accuracy.

### Reduced Data Expenses with Customization

With most bankruptcy products, you receive a hit and are charged regardless of the bankruptcy status. However, with our custom bankruptcy monitoring, you can choose from 13 different statuses and special events to create a custom product that only returns the data that matters to you.

### Enhanced Accuracy through Human Intervention

Did you know that up to 6% of bankruptcy records contain errors? To correct this, we use a data quality team to validate the bankruptcies, in addition to standardizing the name and address information. This additional step helps to prevent missed revenue opportunities and reduce risk exposure.

Maximize your debt recovery potential by focusing on the right accounts and reducing regulatory risk.
